Bulbs for 25c.

DAFFODILS, JONQUILS or NARCISSUS

We wish to call attention to the fact that all of the bulbs listed below are of MOTHER BULB stock unless otherwise specified. MOTHER BULBS are larger, heavier, produce more blooms per bulb, and increase faster than sizes that are listed as "double nose," "firsts," or "round." MOTHER BULBS are the ones ordinarily reserved by the growers for planting stock. It is only by paying a premium that we are enabled to offer this type of bulb. The above facts are sufficient recommendation for their use without further explanation. A true picture of comparative prices can only be reached when these facts are taken into consideration.

This is a Daffodil.
Greatly reduced in
size.

TRUMPET DAFFODILS

	Each	Mother Bulbs Per Doz.	Per 100
BULBOCODIUM CITRINUS —6 in. The lemon yellow Hoop Petticoat daffodil that is so valuable for rock gardens	.25	\$2.10
